The **EXT-POE3 extender** is a device designed to increase the PoE and Ethernet range by additional 100 meters using UTP Cat. 5/5e cable. The Extender can be powered using a PoE switch or another PoE-compliant device (PoE IN input). The output voltage and data are available at the PoE OUT1, PoE OUT2, PoE OUT3 outputs designed for connecting cameras or other IP devices using PoE power supply. The maximum load current is 0,6A (see Tab.1). The PoE OUT1, PoE OUT2, PoE OUT3 ports are supplied over 4/5 (+) and 7/8 (-) pairs, which, according to the Ethernet standard, are not used for data transmission (data transmission uses 1/2 and 3/6 twisted pairs).
